BUSINESS ANALYTICS & AUTOMATION

Ten years in, and I still find it rewarding when a messy dataset turns into a dashboard that helps people decide faster. I've always liked being across different parts of the business — understanding how things connect, building analytical models, and spotting what's slowing teams down. Whether that's a Power BI report, an automated workflow, or a full-stack app built with AI, the goal is always the same: give people back their time. I'm just as comfortable talking numbers with finance as discussing data with IT.

EXPERIENCE

Product Controller

Ronzino Von Oswald, Lda - Textile (B2B)
Jan 26 – Present

- Built AI-powered scripts and an internal app to automate administrative processes; actively use AI tools to improve operational efficiency;
- Designed data visualizations and analytical models to support data-driven product decision;
- Bridge between product and finance areas; defined and tracked key product metrics;
- Analysed product margins and profitability to support data-driven decisions;
- Stock management and demand analysis for Merchandising business unit with hands-on experience in demand forecasting and purchase planning using historical data and seasonality analysis.

Product Manager & Business Analyst

Eternal & Modern - Luxury Jewelry (B2C)
May 24 – Dec 25 *Internal transition from Suprides (same business group)*

- Developed demand forecasts for Swarovski stores (PT & ES) using historical sales data and seasonality patterns;
- Analysed sales trends and demand drivers to support purchasing decisions and inventory optimisation and monitored stock levels;
- Built Power BI dashboards translating business objectives into analytical insights;
- Acted as bridge between business stakeholders and IT enhancements; analysis of business data (e.g., in BI support);
- Process and analytical support to all areas of the business;

Purchasing Manager & Business Analyst

Suprides - IT Distribution (B2B)
May 23 – May 24

- Supported procurement operations, including supplier coordination and order placement;
- Contributed to reporting and KPI tracking using Excel and PBI;
- Collaborated with cross-functional teams to support operational needs.

Business Controller

Also Group - IT Distribution (B2B)
Jul 22 – Mar 23 *Transitioned to ALSO following acquisition of jp.di by ALSO Group*

- Analysed business data and built BI reports to support strategic decisions;
- Monitored and reported KPIs to senior management;
- Controlled accruals/rebates and product investment claims.

Business Analyst

JP Sá Couto, SA - IT Distribution (B2B)
Jan 19 – Jul 22

- Delivered data analysis and BI reporting across all business areas;
- Strategic Plan Control;
- Translated business objectives into KPIs and analytical requirements;
- Bridge between business management and IT;
- Supported ERP and data processes.

Director Assistant

JP Sá Couto, SA - IT Distribution (B2B)
Oct 14 – Jan 19

- Created BI reports and Excel dashboards for management reporting;
- Analytical and process support across all business areas.
